W ENDING SHELTER COUNT	275	432	707

Fostered animals are counted in the opening and closing balances.

Healthy (H) animals are those who do not require medical, behavioral, or foster care to make them ready for adoption. This includes all dogs and cats who are eight weeks of age or older and do not have any sign of disease, injury, or behavior that could pose a health or safety risk or otherwise make the animal unsuitable for placement as a pet.

Treatable-manageable (T/M) animals are those who are not likely to become healthy but could have a good quality of life if provided with treatment for their condition comparable with that typically provided in the community, provided the animal does not pose a risk to the health or safety of other animals or people.

Treatable-rehabilitatable (T/R) animals are those who are likely to become healthy if provided with treatment for their condition compatible with that typically provided in the community.

Unhealthy-untreatable (U/U) animals are those who either have a behavioral or temperamental characteristic that poses a health or safety risk or otherwise makes the animal unsuitable for placement as a pet, or are suffering from a disease, injury, or congenital condition that adversely affects the animal's health and will not become healthy or treatable even with a level of care typically provided in the community.

Line G and Line R are adjustments for unhealthy and untreatable euthanasia at the time of death. AC&C NYC does assign asilomar status animals at the time of intake.
